

Hubert Österle

Business in the Information Age

Heading for New Processes

With 198 Figures

Springer

Table of Contents

1. Introduction	1
1.1. The Transformation of the Economy	1
1.2. Business Transformation and its Roots	9
1.3. Business Engineering	13
1.3.1. From Business Strategy to Information System	14
1.3.2. Business Engineering Procedures	21
1.3.3. The Business Engineering Discipline	26
1.4. The PROMET Method	31
1.5. Reader's Guide	32
2. Organization Design	35
2.1. The Goals of Organization Design	36
2.2. Process Model	37
2.2.1. An Example of Process Design	38
2.2.1.1. The Sales Process at the Macro-Level	38
2.2.1.2. The Sales Process at the Micro-Level	45
2.2.1.3. Summary of the Process Design for UNTEL's Sales	48
2.2.2. Process Model	48
2.2.2.1. Activity Chains	49
2.2.2.2. Outputs	52
2.2.2.3. Process Management	54
2.2.2.4. Process Development	56
2.2.2.5. Information System	58
2.2.2.6. Process Architecture	61
2.2.2.7. Summary	62
2.3. Process Vision	63
2.3.1. Sources of Process Innovation	65
2.3.2. Analysis of the Business Network	66
2.3.3. The Ideal Process	72

2.3.4. Information Technology	73
2.3.5. Reconciliation of Business Strategy and Process Vision	73
2.3.6. General Techniques	77
2.3.7. Summary	77
2.4. Output Analysis	78
2.4.1. Context Diagram	79
2.4.2. Output Catalogue	80
2.4.3. Quality Profile	81
2.4.4. Summary	85
2.5. Flow Planning	86
2.5.1. Deriving the Process Flows	86
2.5.2. Detailing the Flow	90
2.5.3. Documenting the Flow	94
2.5.4. Summary	98
2.6. Workflow Planning	98
2.6.1. Manual Flow Control	98
2.6.2. Flow Control Using a Workflow Management System.....	100
2.6.3. Extended Activity Chain Diagram	103
2.6.4. Summary	105
2.7. Process Management	105
2.7.1. Determining a Process's Critical Success Factors	107
2.7.2. Deriving the Performance Indicators	112
2.7.3. Organization of Process Management	117
2.7.3.1. Management Cycle for Process Management	118
2.7.3.2. Process Management Positions and Committees	124
2.7.4. Management Principles	127
2.7.5. Summary	128
2.8. Architecture Planning	128
2.8.1. Derivation of Process Candidates.....	129
2.8.2. Detailing and Checking the Process Candidates	134
2.8.3. Selecting the Processes	136

2.8.4. Summary	138
2.9. IT Assessment	140
2.9.1. IT Map	140
2.9.2. Computerization Trends	144
2.9.3. Application Types	145
2.9.4. Procedure in IT Assessment.....	154
2.10. Customer Relationship Analysis.....	155
2.10.1. Customer Activities	156
2.10.2. The Supplier's Activities	157
2.10.3. Relationships.....	158
2.10.4. IT Potential	159
2.10.5. Analysis of the Customer Relationships	159
2.10.6. Summary	160
2.11. Activity-Specific Analyses	161
2.11.1. Processing Time Analysis	162
2.11.2. Cost Analysis	164
2.11.3. Summary	165
2.12. Benchmarking	165
2.12.1. Subject Matter.....	166
2.12.2. Range	168
2.12.3. Information Sources	169
2.12.4. Problems	169
2.12.5. Summary	170
2.13. Organizational Monitoring.....	170
2.13.1. Sources	171
2.13.2. Analysis	173
2.13.3. Summary	179
2.14. Further Reading	180

3. Data Design.....	183
3.1. Data Design Objectives.....	183
3.2. Data Model	187
3.2.1. Entity Type	187
3.2.2. Relationships Between Entity Types	190
3.2.3. Notation	193
3.3. Normalization	195
3.4. 'Semantic and Object-Oriented Data Modelling'	220
3.5. Keys	224
3.6. Integrity Conditions	230
3.7. Code Tables	235
3.8. Providing Data History	238
3.9. Data Integration	242
3.9.1. Types of Data Integration.....	243
3.9.2. Synchronous and Asynchronous Data Exchange Between Transactions.....	248
3.9.3. Data Exchange Requirements	251
3.9.4. Data Standards	256
3.9.5. Description of Interfaces.....	261
3.9.6. Summary	261
3.10. Implementing the Data Model	262
3.10.1. Data Definition Language.....	263
3.10.2. Structured Query Language	264
3.10.2.1. Read Only Access	265
3.10.2.2. Write Access	270
3.10.3. Denormalization.....	272
3.10.4. Digression: 'Object-Oriented Model'.....	277
3.11. Further Reading	279

4. Function Design.....	281
4.1. Objectives of Function Design	281
4.2. Function Model	284
4.3. Derivation of Transactions	288
4.4. Checking for Completeness	296
4.4.1. Effect Modelling	296
4.4.2. Entity Life History	298
4.5. Derivation of Applications and Databases	303
4.6. Transaction Network.....	307
4.7. Lists and Messages.....	315
4.8. Designing the User Interface	317
4.8.1. Screen Masks.....	318
4.8.2. Menus.....	320
4.8.3. Dialogue Flow	324
4.8.4. Dialogue Prototyping	329
4.9. Control Structure	330
4.10. Authorization.....	341
4.11. Workflow Design	345
4.11.1. Functionality of WFMS.....	345
4.11.2. Separation of Transactions and Workflow	347
4.11.3. Implications for Function Design.....	350
4.11.4. Summary	350
4.12. Further Reading	351

5. Foundations of a Business Engineering Method353

5.1. Business Engineering Levels..... 353

5.1.1. Strategy 355

5.1.2. Process 356

5.1.3. Information System 357

5.1.4. Linking the Business Engineering Levels 358

5.2. Business Engineering Meta-Model 359

5.3. Business Engineering Method 361

Bibliography.....365
