TABLE OF CONTENTS

TABLE OF CONTENTS	3
SUMMARY	5
RIASSUNTO	8
1. INTRODUCTION	11
2. WET DEPOSITION	13
2.1 Introduction	13
2.2 Location of sampling sites and sampling methods	14
2.3 Analytical methods and data quality control	16
2.4 Precipitation analysis	22
2.5 Temporal trend of concentrations in precipitation for the period 1982-1998	28
2.6 Temporal trend of pH values	30
2.7 Principal component analysis	32
2.8 Descriptive and predictive models and validation	34
2.9 Precipitation volume measurement and mapping	40
2.10 Concentration maps and wet deposition maps	45
2.10.1 Concentration maps	45
2.10.2 Wet deposition maps	48
2.11 Seasonal variation of solutes concentrations and depositions	52
2.12 Rainout and washout: a tentative interpretation	58
3. DRY DEPOSITION OF GASES	65
3.1 Introduction	65
3.2 Sulphur dioxide deposition	66
3.3 Nitrogen dioxide, nitric acid and ammonia deposition	71
4. DRY DEPOSITION OF AEROSOLS	75
5. PRESENT LOADS OF ACIDITY	79
5.1 Introduction	79
5.2 Maps of Present Loads of Acidity and contributions of sulphur and nitrogen compounds	79
5.3 Cumulative frequency distributions of acidifying compounds for different ecosystems	88
5.4 Present Loads of Acidity with full acidifying potential of ammonia	92
ACKNOWLEDGEMENTS	95

REFERENCES 97

ANNEXES 1 101

Definitions 101
Abbreviations 102
Symbol and units 103
Sources of topography, land use and forests data for Cantone Ticino..... 104
Software 105

ANNEXES 2 107

Some notes on the precipitation in the Lake Maggiore Watershed..... 107
Weather conditions south of the Alps according to the direction of upper-level currents 107
Meteorological models and trajectories of air masses arriving in southern Alpine region 108
Pluviometric maps of the Lake Maggiore catchment basin 109
Precipitation in 1993-1998 compared with climatology..... 109
Why is there a precipitation maximum in the Centovalli area?..... 110
Acknowledgment..... 110
References..... 110
