Contents

Preface to the 'second edition IX . ,

Acknowledgements X

'1 ; **Understanding research 1**

Introduction 1

Definition and purpose, of research 7 . . .

Qualities of a good researcher 2

Types of research,10 . . .

The research process 15

Characteristics of a good research project 18

Conclusions 19 . - . . , .

|2) **Dealing with practical issues 27**

Introduction 27 . * \;

Course requirements 27 '

Choosing an academic institution 27

Funding 32 ,

Negotiating access 34 :

Ethics 37

Managing the research 40

Conclusions 44

|3 i **Dealing with conceptual issues 46 . • .**

Introduction 46

Research paradigms 46

Paradigms and methodology 54

Types of research methodology 60 .

Positivistic methodologies 61 • . • •

Phenomenological methodologies 66

Mixing methodologies 76

Conclusions 79

Searching the literature 80

Introduction 80

Generating a research topic 80

Overview of the literature search 84

Starting a literature search 86

Computerised databases 95

Recording references 703

The literature review 770

Conclusions 772

Determining the research design 773

Introduction 773

Overview of research design 773

Identifying a research problem 775

Determining the purpose of the research" 779

Developing a theoretical framework 722

Defining research questions or hypotheses 724

Defining terms 727

Identifying limitations and delimitations 728

Deciding the methodology 729

Determining the expected outcome 729

Writing the research proposal 730

Examples of business research proposals 734

Conclusions 749

Collecting original data 750

Introduction 750

Overview of data collection 750

Variables 757

Selecting a sample 755

Data 760

Data collection methods 762

Designing questions 777

Coding for computer analysis'768.

Recording data and observations	792
Conclusions	794

Analysing quantitative data 795

Introduction	795
Overview of quantitative data analysis	795
Exploratory data analysis	798
Presenting frequencies	798
Measuring location	272
Measuring dispersion	277
Measuring change	223
Confirmatory data analysis	230
Estimating from samples	232
Measuring association	236
Measuring differences	247
Forecasting	245
Conclusions	250

Analysing qualitative data 252

Introduction	252
Overview of qualitative data analysis	252
Quantifying methods of qualitative data analysis	254
Non-quantifying methods of qualitative data analysis	267
Evaluating the analysis	278
Conclusions	279

Writing up the research 287

Introduction	287
Planning the research report	287
Content of the report	297
Presenting qualitative data	299
Presenting quantitative data	307
Eleventh-hour strategies	373
Standards	374
The viva	375
Writing papers and articles	378
Conclusions	327

Trouble shooting 322

Introduction 322

Getting started 323

Managing the research 324

Identifying a research topic 325

Making a preliminary plan of action 326

Applying a theoretical framework 327

The research proposal 328

Deciding the methodology 329

Searching and reviewing the literature 330

Collecting data 337

Organising the data in a phenomenological study 332

Analysing data 333

Structuring the research report 334

Writing the research report 335

Dealing with writer's block 336

Achieving the standards 337

Appendix A Random number tables 338

Appendix B Critical values of Pearson's r 339

Appendix C Critical values of Spearman's r_s 340

Appendix D, Critical values of χ^2 347

Appendix E Critical values of f 342

Glossary 343
