 Chapter 15: Forecasting the future portfolio	 120
Forecasting the distribution of future cash flows	120
The need for cash flow modelling	120
Important issues on the use of cash flow models for forecasting	121
Monitoring risk numbers	121
Forecasting the performance of the portfolio	122
Using the interim IRR	122
Improving the forecasting power of the interim IRR	122

CONTENTS

Chapter 16: Steering the portfolio	124
General issues	124
Liquidity reserves	124
Overcommitment	125
Diversification	126
Chapter 17: Advanced cash flow modelling	127
Cash flow modelling	127
The importance to fund investors	127
Public disclosure	127
The challenges	128
High model risk	128
Cash flow patterns as a guide to fund investors	129
The pattern of fund cash flows	129
Studies on historical patterns	130
Different types of cash flow models	131
Models of a fund as; a portfolio of direct investments	132
Model based on manager cash flow estimates	132
Model based on company grading	133
Non-probabilistic models at fund level	133
Simple approach	133
Takahashi and Alexander's model	134
Weidig's interim IRR model	134
Probabilistic models at fund level	135
Fitch Ratings model	135
Standard & Poor's model	135
Weidig internal age model	136
Partners Group model	136
Malherbe model	137
Kaserer and Diller model proposal	137
Part IV Alternative private equity investment vehicles	141
Chapter 18: Helping institutional investors to access private equity	143
The role of the alternative investments	143
Outsourcing	144
Exiting private equity	144
Chapter 19: Funds of funds	146
Advantages	146
Outsourcing	146
Larger networks	146
Accessibility	146
Increased diversification	147
Deal flow availability	147
Greater bargaining power	147

Disadvantages	147
Additional layer of fees	147
Less control	148
Illiquidity	148
Hard to find perfect match	148
Overcrowded market	148
Selecting a fund of funds management team	148
Ability to access the best fund management teams	148
Investment strategies as differentiating factor	149
Other selection criteria	150
The risk profile of a fund of funds	151
 Chapter 20: Secondary transactions	 152
Motivation and considerations on the sell-side	152
Reasons to sell	152
Disadvantages to selling	153
Motivation and considerations on the buy-side	153
Advantages	153
Disadvantages	154
Outsourcing the investment into secondary transactions	155
 Chapter 21: Securitisation and structured instruments in private equity	 156
Securitisation of private equity funds	156
Benefits	156
Disadvantages	157
Prospects	158
Structured instruments and hedge funds	158
Other products: publicly traded private equity	159
 Chapter 22: Conclusion	 161
 Glossary	 163
 Bibliography and further reading	 178
