Notations and Abbreviations xxi

I An Overview of QEPM 1

1 The Power of QEPM 3

1.1 Introduction 3

1.2 The Advantages of QEPM 7

1.3 Quantitative and Qualitative Approaches to Similar Investment Situations 12

1.4 A Tour of the Book 17

1.5 Conclusion 19

2 The Fundamentals of QEPM 21

2.1 Introduction 21

2.2 QEPMa 22

2.2.1 Benchmark a 23

2.2.2 CAPMa 23

2.2.3 Multifactor a 24

2.2.4 A Variety of a's 24

2.2.5 Ex-Ante and Ex-Post a 26

2.2.6 Ex-Ante and Ex-Post Information Ratio 26

2.3 The Seven Tenets of QEPM 27

2.4	Tenets 1 and 2: Market Efficiency and QEPM	29
2.4.1	The Efficient-Market Hypothesis	29
2.4.2	Anomalies	33
2.4.3	Market Efficiency and QEPM	42
2.5	Tenets 3 and 4: The Fundamental Law, The Information Criterion, and QEPM	48
2.5.1	The Truth about the Fundamental Law	49
2.5.2	The Information Criterion	51
2.5.3	Information Loss	52
2.6	Tenets 5, 6, and 7: Statistical Issues in QEPM	52
2.6.1	Data Mining	53
2.6.2	Parameter Stability	57
2.6.3	Parameter Uncertainty	57
2.7	Conclusion	58
3	Basic QEPM Models	65
3.1	Introduction	65
3.2	Basic QEPM Models and Portfolio Construction Procedures	66
3.2.1	Factor Choice	67
3.2.2	The Data Decision	68
3.2.3	Factor Exposure	69
3.2.4	Factor Premium	70
3.2.5	Expected Return	71
3.2.6	Risk	71
3.2.7	Forecasting	72
3.2.8	Security Weighting	72
3.3	The Equivalence of the Basic Models	73
3.4	The Screening and Ranking of Stocks with the Z-Score	75
3.5	Hybrids of the Models and the Information Criterion	75
3.5.1	The Setup	76
3.5.2	The Z-Score Model	77
3.5.3	A Hybrid of the Z-Score Model and a Fundamental Factor Model	78
3.5.4	Information Loss	79
3.6	Choosing the Right Model	81
3.6.1	Consistency with Economic Theory	81
3.6.2	Ability to Combine Different Types of Factors	82

- 3.6.3 Ease of Implementation 82
- 3.6.4 Data Requirement 82
- 3.6.5 Intuitive Appeal 83
- 3.7 Conclusion 84

II Portfolio Construction and Maintenance 89

4. Factors and Factor Choice 91

- 4.1 Introduction 91
- 4.2 Fundamental Factors 92
 - 4.2.1 Valuation Factors 92
 - 4.2.2 Solvency Factors 97
 - 4.2.3 Operating Efficiency Factors 99
 - 4.2.4 Operating Profitability Factors 100
 - 4.2.5 Financial Risk Factors 103
 - 4.2.6 Liquidity Factors 104
- 4.3 Technical Factors 106
- 4.4 Economic Factors 107
- 4.5 Alternative Factors 108
 - 4.5.1 Analyst Factors 108
 - 4.5.2 Corporate Finance Policy Factors 110
 - 4.5.3 Social Responsibility Factors 110
- 4.6 Factor Choice 111
 - 4.6.1 Univariate Regression Tests 112
 - 4.6.2 Multiple Regression Tests 113
 - 4.6.3 Unidimensional Zero-Investment Portfolio 114
 - 4.6.4 Multidimensional Zero-Investment Portfolio 116
 - 4.6.5 Techniques to Reduce the Number of Factors 116
- 4.7 Conclusion 118

Appendix 4A: Factor Definition Tables 119

5. Stock Screening and Ranking 135

- 5.1 Introduction 135
- 5.2 Sequential Stock Screening 136
- 5.3 Sequential Screens Based on Famous Strategies 137
- 5.4 Simultaneous Screening and the Aggregate Z-Score 145

- 5.4.1 The Z-Score 147
- 5.4.2 The Aggregate Z-Score 149
- 5.4.3 Ad Hoc Aggregate Z-Score 150
- 5.4.4 Optimal Aggregate Z-Score 150
- 5.4.5 Factor Groups and the Aggregate Z-Score 154
- 5.5 The Aggregate Z-Score and Expected Return 158
 - 5.5.1 Expected Return Implied by the Z-Score 158
 - 5.5.2 The Forecasting Rule of Thumb 161
 - 5.5.3 The Equivalence between the Z-Score Model and the Fundamental Factor Model 162
- 5.6 The Aggregate Z-Score and the Multifactor α 163
- 5.7 Conclusion 164

Appendix 5A: A List of Stock Screens Based on Weil-Known Strategies 166

Appendix 5B: On Outliers 179

6. Fundamental Factor Models 185

- 6.1 Introduction 185
- 6.2 Preliminary Work 188
 - 6.2.1 Choosing Factors 189
 - 6.2.2 Treatment of the Risk-Free Rate 189
 - 6.2.3 Choosing the Time Interval and Time Period 190
 - 6.2.4 Choosing the Universe of Stocks 192
- 6.3 Benchmark and α 193
- 6.4 Factor Exposure 194
- 6.5 The Factor Premium 196
 - 6.5.1 OLS Estimator of the Factor Premium 197
 - 6.5.2 Robustness Check 199
 - 6.5.3 Outliers and MAD Estimator of Factor Premium 200
 - 6.5.4 Heteroscedasticity and GLS Estimator of the Factor Premium 201
- 6.6 Decomposition of Risk 202
- 6.7 Conclusion 205

7 Economic Factor Models 211

- 7.1 Introduction 211
- 7.2 Preliminary Work 214
- 7.3 Benchmark and α 216

7.4	The Factor Premium	217
7.4.1	Factor Premium for Economic/Behavioral/ Market Factors	218
7.4.2	Factor Premium for Fundamental/Technical/ Analyst Factors	219
7.4.3	Factor Premium for Statistical Factors	222
7.5	Factor Exposure	223
7.5.1	The Standard Approach	223
7.5.2	When the Standard Approach Fails	225
7.6	Decomposition of Risk	226
7.6.1	The Standard Approach	226
7.6.2	When the Standard Approach Fails	228
7.7	Conclusion	229
8	Forecasting Factor Premiums and Exposures	235
8.1	Introduction	235
8.2	When Is Forecasting Necessary?	236
8.3	Combining External Forecasts	237
8.4	Model-Based Forecast	238
8.5	Econometric Forecast	239
8.6	Parameter Uncertainty	242
8.7	Forecasting the Stock Return	244
8.8	Conclusion	246
9	Portfolio Weights	253
9.1	Introduction	253
9.2	Ad Hoc Methods	255
9.3	Standard Mean-Variance Optimization	256
9.3.1	No Constraints	258
9.3.2	Short-Sale and Diversification Constraints	262
9.3.3	Sector or Industry Constraints	266
9.3.4	Trading-Volume Constraint	266
9.3.5	Risk-Adjusted Return	267
9.4	Benchmark	268
9.5	Ad Hoc Methods Again	268
9.6	Stratification	271
9.7	Factor-Exposure Targeting	273
9.8	Tracking-Error Minimization	276
9.8.1	Direct Computation	276
9.8.2	Tracking by Factor Exposure	278

- 9.8.3 Ghost Benchmark Tracking 280
- 9.8.4 Risk-Adjusted Tracking Error 281
- 9.9 Conclusion 282

Appendix 9A: Quadratic Programming 284

- 9A.1 Quadratic Programming with Equality Constraints 285
- 9A.2 A Numerical Example 287
- 9A.3 Quadratic Programming with Inequality Constraints 289
- 9A.4 A Numerical Example 293

10 Rebalancing and Transactions Costs 299

- 10.1 Introduction 299
- 10.2 The Rebalancing Decision 301
 - 10.2.1 Rebalancing and Model Periodicity 301
 - 10.2.2 Change in α and Other Parameters 302
- 10.3 Understanding Transactions Costs 303
- 10.4 Modeling Transactions Costs 304
- 10.5 Portfolio Construction with Transactions Costs 306
 - 10.5.1 The Optimal Portfolio with Transactions Costs 306
 - 10.5.2 The Tracking Portfolio with Transactions Costs 308
- 10.6 Dealing with Cash Flows 309
 - 10.6.1 Reducing Transactions Cost Using Futures and ETFs 309
 - 10.6.2 Rebalancing toward Optimal Target Weights 310
- 10.7 Conclusion 317

Appendix 10A: Approximate Solution to the Optimal Portfolio Problem 318

11 Tax Management 323

- 11.1 Introduction 323
- 11.2 Dividends, Capital Gains, and Capital Losses 324
- 11.3 Principles of Tax Management 327
- 11.4 Dividend Management 329
- 11.5 Tax-Lot Management 332
- 11.6 Tax-Lot Mathematics 334
- 11.7 Capital Gain and Loss Management 335

- 11.8 Loss Harvesting 338
 - 11.8.1 Loss Harvesting and Reoptimizing 338
 - 11.8.2 Loss Harvesting and Characteristic Matching 340
 - 11.8.3 Loss Harvesting with a Benchmark 341
- 11.9 Gains from Tax Management 341
- 11.10 Conclusion 343

III a Mojo 347

12 Leverage 349

- 12.1 Introduction 349
- 12.2 Cash and Index Futures 351
 - 12.2.1 Theoretical Bounds of Leverage 353
 - 12.2.2 Leverage Mechanics 354
 - 12.2.3 Expected Return and Risk 356
- 12.3 Stocks, Cash, and Index Futures 357
 - 12.3.1 Theoretical Limits to Leverage 359
 - 12.3.2 Leverage Mechanics 359
 - 12.3.3 Expected Returns and Risk 360
- 12.4 Stocks, Cash, and Single-Stock Futures 362
 - 12.4.1 Theoretical Limits of Leverage 363
 - 12.4.2 Leverage Mechanics 364
 - 12.4.3 Expected Returns, Risk, and a Mojo 367
- 12.5 Stocks, Cash, Individual Stocks, and Single-Stock and Basket Swaps 370
 - 12.5.1 Margining Individual Stocks 371
 - 12.5.2 Single-Stock and Basket Swaps 371
- 12.6 Stocks, Cash, and Options 373
- 12.7 Rebalancing 376
 - 12.7.1 Cash and Futures 376
 - 12.7.2 Stocks, Cash, and Futures 379
- 12.8 Liquidity Buffering 380
- 12.9 Leveraged Short 384
- 12.10 Conclusion 385

Appendix 12A: Fair Value Computations 387

Appendix 12B: Derivation of Equations (12.19), (12.20), and (12.21) 389

Appendix 12C: Tables of Futures Leverage Multipliers to Achieve Various Degrees of Leverage 391

13 Market Neutral 399

- 13.1 Introduction 399
- 13.2 Market-Neutral Construction 401
 - 13.2.1 Security Selection 401
 - 13.2.2 Dollar Neutrality 402
 - 13.2.3 Beta Neutrality (a.k.a Risk-Factor Neutrality) 403
 - 13.2.4 Market-Neutral Portfolio Out of a Long-Only Portfolio 406
- 13.3 Market Neutral's Mojo 406
- 13.4 The Mechanics of Market Neutral 409
 - 13.4.1 Margin and Shorting 409
 - 13.4.2 The Margin and Market Neutral 411
 - 13.4.3 Sources of the Return 412
- 13.5 The Benefits and Drawbacks of Market Neutral 414
- 13.6 Rebalancing 419
- 13.7 General Long-Short 420
 - 13.7.1 Long-Short 420
 - 13.7.2 Equitization 421
 - 13.7.3 Portable a 422
 - 13.7.4 Pair Trading 424
- 13.8 Conclusion 428

14 Bayesian a 435

- 14.1 Introduction 435
- 14.2 The Basics of Bayesian Theory 436
- 14.3 Bayesian a Mojo 439
- 14.4 Quantifying Qualitative Information 440
 - 14.4.1 Quantifying a Stock Screen 440
 - 14.4.2 Quantifying a Stock Ranking 442
 - 14.4.3 Quantifying the Buy and Sell Recommendations 443
- 14.5 The Z-Score-Based Prior 444
- 14.6 Scenario-Based Priors 445
- 14.7 Posterior Computation 448
- 14.8 The Information Criterion and Bayesian a 450
- 14.9 Conclusion 451

IV Performance Analysis 457**15 Performance Measurement and Attribution 459**

- 15.1 Introduction 459

15.2	Measuring Returns	461
15.2.1	No Cash Flows	462
15.2.2	Inflows and Outflows	465
15.2.3	Measuring Returns for Market Neutral and Leveraged Portfolios	468
15.3	Measuring Risk	470
15.3.1	Standard Deviation	471
15.3.2	Semi-Standard Deviation	472
15.3.3	Tracking Error	473
15.3.4	CAPM (β)	474
15.3.5	Value-at-Risk	476
15.3.6	Covariance and Correlation	477
15.4	Risk-Adjusted Performance Measurement	477
15.4.1	The Sharpe Ratio	479
15.4.2	The Information Ratio	480
15.4.3	The CAPMa and the Benchmark a	481
15.4.4	The Multifactor a	482
15.4.5	Practical Issues with Risk-Adjusted Measures	485
15.5	Performance Attribution	488
15.5.1	Classical Attribution	488
15.5.2	Multifactor QEPM Attribution	491
15.6	Conclusion	496
 Appendix 15A: Style Analysis 497		
Appendix 15B: Measures of Opportunity 503		
Appendix 15C: Short Returns 507		
Appendix 15D: Measuring Market Timing Ability 509		
 V Practical Application 519		
 16 The Backtesting Process 521		
16.1	Introduction	521
16.2	The Data and Software	522
16.3	The Time Period	525
16.4	The Investment Universe and the Benchmark	531
16.4.1	U.S. Equity Benchmarks	532
16.4.2	A Comparison of the Major U.S. Equity Benchmarks	535
16.4.3	The Most Popular Benchmarks and Our Benchmarks	537

- 16.5 The Factors 542
- 16.6 The Stock-Return and Risk Models 554
- 16.7 Parameter Stability and the Rebalancing Frequency 556
- 16.8 Variations on the Baseline Portfolio 559
 - 16.8.1 Transactions Costs 560
 - 16.8.2 Taxes 562
 - 16.8.3 Leverage 564
 - 16.8.4 Market Neutral 565
- 16.9 Conclusion 566

Appendix 16A: Factor Formulas 567

17 The Portfolios' Performance 581

- 17.1 Introduction 581
- 17.2 The Performance of the Baseline Portfolios 582
 - 17.2.1 The Fundamental Factor Model Performance 582
 - 17.2.2 The Aggregate Z-Score Model Performance 585
 - 17.2.3 The Economic Factor Model Performance 586
 - 17.2.4 Performance Reports for Distribution 588
 - 17.2.5 Performance Attribution for the Economic Factor Baseline Model 590
- 17.3 The Transactions Cost-Managed Portfolio Performance 596
- 17.4 The Tax-Managed Portfolio Performance 596
- 17.5 The Leveraged Portfolio Performance 599
- 17.6 The Market-Neutral Portfolio Performance 600
- 17.7 Conclusion 603
