

# **Japanese R&D Management: A Holistic Network Approach**

**Dissertation**

**der Hochschule St. Gallen  
für Wirtschafts-, Rechts- und Sozialwissenschaften  
zur Erlangung der Würde eines  
Doktors der Wirtschaftswissenschaften**

**vorgelegt von**

**Sigvald Harryson**

**aus Schweden**

**Genehmigt auf Antrag der Herren**

**Prof. Dr. Emil Brauchlin  
und  
Dr. Hellmut Schütte**

**Dissertation Nr. 1678**

**Difo-Druck GmbH, Bamberg 1995**

# Japanese R&D Management: a Holistic Network Approach

## Table of Contents

### 1 Introduction & Research Strategy

<b>1.1 The Performance Gap: Causes and Consequences</b>	
1.1.1 Introducing the Gap and the Research Problem	1
1.1.2 Traditional Explanations	2
1.1.3 Towards a Closure of the Gap?	4
<b>1.2 Brief Study of R&amp;D Management at Toshiba Computers</b>	
1.2.1 Empirical Presentation	6
1.2.2 Crystallising Out the Key Factors	10
1.2.3 Confronting the Key Factors with Current Literature	12
<b>1.3 A Deeper Penetration of the Research Problem</b>	
1.3.1 The Role of Research in Japanese R&D Management	13
1.3.2 Introducing Definitions	14
1.3.3 Locational Context Inside the Black Box	16
1.3.4 Locational Context Outside the Black Box	17
<b>1.4 Theoretical Perspective</b>	
1.4.1 Developing a Conceptual Framework	20
1.4.2 Japanese R&D Management as an Act of Networking	23
<b>1.5 Main Objectives of the Study</b>	
1.5.1 Introducing the Dilemmas of Innovation	24
1.5.2 Analysing Three Network Foci	25
1.5.3 Delimitations of the Study	26
<b>1.6 Research Strategy</b>	
1.6.1 Epistemological Stance	26
1.6.2 Research Methodology	27
1.6.3 Case Study Methodology	29
1.6.4 The Data Gathering Process	31
1.6.5 Summarised Contents of the Study	37

### 2 Developing a Theoretical Framework

<b>2.1 Crystallising the Picture of Japanese R&amp;D Management</b>	
2.1.1 Differences in Lead-Time & R&D Productivity	39
2.1.2 Linkages to Extracorporate Actors and Activities	42
2.1.3 Interlinking Market Needs	46
2.1.4 Interlinking Production	47
2.1.5 Intraorganisational Link-Building	50
2.1.6 Crystallising a Preliminary Model	52

<b>2.2 Universal Theories on R&amp;D and Innovation</b>	
2.2.1 Interlinking Extracorporate Sources of Technology	54
2.2.2 Interlinking R&D and Market Needs	55
2.2.3 Interlinking R&D and Production	55
2.2.4 Uncertainty Reduction	58
Epilogue: Is Technological Leadership a Competitive Weapon?	60
<b>2.3 Theoretical Dilemmas of Innovation</b>	
2.3.1 The Dilemma of Technological Leadership	61
2.3.2 The Organisational Dilemma of Innovation	66
2.3.3 Implications for the Theoretical Framework	67
<b>3 Surrounding R&amp;D Networks</b>	
<b>3.1 A Brief Introduction to Japanese Corporate Networks</b>	
3.1.1 Introducing Definitions	70
3.1.2 Brief Historical Background	71
3.1.3 Kinyu Shudan, or Financial Corporate Groups	71
3.1.4 Kigyo Keiretsu, or Vertically Interlinked Suppliers	73
3.1.5 Interlinking Kinyu Shudan and Kigyo Keiretsu	74
<b>3.2 R&amp;D Linkages in Kinyu Shudan</b>	
3.2.1 Coordination of Cooperation	75
3.2.2 Concentrating Resources on R&D	76
3.2.3 Innovation Through Allocation of Resources	78
3.2.4 Technology Scanning and Transfer of Competence	79
3.2.5 Group-Wide Fusion of Competencies	81
<b>3.3 R&amp;D Linkages in the Kigyo Keiretsu Structure</b>	
3.3.1 Coordination of Competition and Cooperation	82
3.3.2 Interlinking Actors and Activities	83
3.3.3 Innovation Through Specialisation	85
3.3.4 Interlinking Complementary Competencies	87
3.3.5 Acceleration of Innovation	87
<b>3.4 Keiretsu Interlinkages of Canon, Sony and Toyota</b>	
3.4.1 Canon's Macroc cosmic Position	89
3.4.2 Sony's Macroc cosmic Position	91
3.4.3 Toyota's Macroc cosmic Position	95
3.4.4 Effects on R&D of the Keiretsu Interlinkages	98
<b>3.5 Governmental R&amp;D Networks</b>	
3.5.1 Access to Resources	101
3.5.2 Coordination and Interlinkage of R&D Activities	101
3.5.3 Canon's MITI Interaction	103
3.5.4 Sony's MITI Interaction	103
3.5.5 Toyota's MITI Interaction	104
<b>3.6 Additional Linkages to External Sources of Technology</b>	
3.6.1 Interlinking Domestic and Foreign Universities	105
3.6.2 Overseas R&D Facilities and Strategic Linkages	105
3.6.3 Canon's Additional Sources of Technology	106
3.6.4 Sony's Additional Sources of Technology	108
3.6.5 Toyota's Additional Sources of Technology	112

## 4 Canon Inc.

<b>4.1 Introduction</b>	114
<b>4.2 Intraorganisational Aspects of R&amp;D</b>	
4.2.1 Business Groups and R&D-Related Headquarters	115
4.2.2 Managing Patents	121
4.2.3 Interlinking Market Needs	122
4.2.4 Job Rotation	123
<b>4.3 Managing the Development Process</b>	
4.3.1 The Role of the Chief Engineer	124
4.3.2 Birth and Evolution of a Task Force	125
4.3.3 Transfer from Research to Product Development	128
4.3.4 Competing Development Teams Working in Parallel	129
<b>4.4 Developing Ferroelectric Liquid Crystal Displays</b>	
4.4.1 External Sourcing of Technology	131
4.4.2 Changing Chief Engineers	135
4.4.3 Evolution of an Increasingly Complex Project	138
4.4.4 The Emerging FLC Group	140

## 5 Sony Corporation

<b>5.1 Introduction</b>	144
<b>5.2 Intraorganisational Aspects of R&amp;D</b>	
5.2.1 Sony's Business Groups	145
5.2.2 The R&D System	145
5.2.3 Managing Patents	148
5.2.4 Interlinking Market Needs	149
5.2.5 Job Rotation	152
<b>5.3 Managing the Development Process</b>	
5.3.1 The Research Planning & Coordination Group	154
5.3.2 Transfer from Research to Product Development	157
5.3.3 Interactive Development	159
5.3.4 Technologies that did not Spread	159
5.3.5 Some Management Principles	160
<b>5.4 Developing the MiniDiscman</b>	
5.4.1 The MiniDiscman Team	163
5.4.2 Setting New Industry Standards	168
5.4.3 Innovation-Promoting Factors	169
5.4.4 Next-Generation MD	170

## 6 Toyota Motor Corporation

<b>6.1</b>	<b>Brief Introduction</b>	<b>172</b>
<b>6.2</b>	<b>Intraorganisational Aspects of R&amp;D</b>	
6.2.1	The Research and Development Group	172
6.2.2	The New Product Development System	175
6.2.3	Interlinking Market Needs	177
6.2.4	Job Rotation	178
<b>6.3</b>	<b>Managing the Development Process</b>	
6.3.1	The Chief Engineers	179
6.3.2	An Interactive Consulting Process	181
6.3.3	Working with Visions	183
6.3.4	Project Scheduling	183
6.3.5	Creating Creativity	184
<b>6.4</b>	<b>Developing the Lexus</b>	
6.4.1	Product Planning	185
6.4.2	Interlinking Market Needs	185
6.4.3	The Empowered Chief Engineer	186
6.4.4	Root-Cause Problem Solving	188
6.4.5	The FQ Committee	189
6.4.6	The Development Process in Brief	191

## 7 Cross-Case Analysis

<b>7.1</b>	<b>Linkages to Extracorporate Sources of Technology</b>	
7.1.1	R&D Resources Through Keiretsu Networks	195
7.1.2	Governmental R&D Networks	196
7.1.3	Additional R&D Linkages	197
<b>7.2</b>	<b>Interlinking Technology and Product Development</b>	
7.2.1	Organising for Analytic Design	202
7.2.2	Interlinking Market Needs	207
7.2.3	Interlinking Production	212
<b>7.3</b>	<b>Managing the Linkages in R&amp;D Projects</b>	
7.3.1	The Birth and Evolution of an R&D Project	217
7.3.2	Interlinking Vital Actors, Activities and Resources	219
7.3.3	Coordinating the Vital Linkages of an R&D Project	223
<b>7.4</b>	<b>Summarising Similarities and Differences Across the Cases</b>	
7.4.1	At the Extracorporate Level	227
7.4.2	At the Intracorporate Level	228
7.4.3	At the Project-level	228

## **8 Main Contributions and Implications of the Study**

<b>8.1 Circumventing the Dilemmas of Innovation: Explaining the Performance Gap</b>	
8.1.1 Interlinking Extracorporate Technological Resources	230
8.1.2 Interlinking Complementary Actors and Activities	232
8.1.3 Managing R&D Projects as Networking Processes	235
<b>8.2 Practical Contributions of the Study</b>	
8.2.1 Concluding Remarks on Canon, Sony and Toyota	237
8.2.2 Practical Implications for R&D Management	239
8.2.3 Personal Observations versus Current Literature	241
<b>8.3 Historical Perspective and Future Outlook</b>	<b>242</b>
<b>8.4 Implications for Further Research</b>	<b>244</b>
