Acknowledgments	xiii
1 More STEM Degrees: Economic Best Bets for Regions?	1
All in on STEM	2
Beyond Degrees: Broadening the View of Regional Human Capital	3
A Complex Relationship: Human Capital and Regional Economic Well-Being	4
STEM: A Tricky Public Investment	6
The “Me Too” Trap	7
Regional Investment in Human Capital Development: A Delicate Balance	8
What to Do? Reshaping Policies for Regional Advantage	9
Making the Case: Exploring An Occupation-Based View of Regional Human Capital	12
2 Misunderstandings and Misapplications	15
Six STEM Fallacies	16
Taking a Different Road	21
3 A Method for Bundling Occupational Skills	23
O*NET Overview	24
O*NET Data Collection	25
Identifying STEM and Soft KSA Bundles	26
Using STEM and Soft KSA Bundles to Categorize Occupations	29
Linking Occupational Skill Sets to Occupational Wage and Employment Data	32
4 STEM Skills, Soft Skills, and Worker Wages	37
Methodology	39
Results and Discussion	40
5 The Intersection of Skill Demand and Regional Well-Being	49
Putting Regional STEM Concentrations to the Test	51
Human Capital Measures and Economic Performance Vary Widely across Regions	55
Testing the Influence of the STEM/Soft Occupation-Based Measures on Regional Economic Well-Being	60
What the Findings Mean	70
Summary	72

6 A Test of Size, Schooling, and Context	75
Educational Attainment and Occupational Skill: The Interplay of Human Capital Development and Deployment	75
A Matter of Size: The Effects of Population on Human Capital Deployment	83
Conclusion	90
7 A Different View of the Middle	91
Defining “Middle”	93
Assessing the Middle	94
Results	98
Conclusion	111
8 Cross-Cutting Skills	115
A Revised Method	116
Results	117
Conclusion	128
9 Concluding Thoughts and Policy Implications	131
Key Takeaways	133
Limitations	139
Policy Implications	140
Closing Thoughts	152
Appendix A: Occupational Wage and Employment by High/Mid/Low STEM/Soft KSAs	153
